DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-22, drawn to a method for characterizing a molecule by mass spectrometry.

Group II, claim(s) 23-37, drawn to mass tag reagents for labeling molecules.

Group III, claim(s) 38-39, drawn to a kit for purification of labeled analyte molecules.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common linking feature is the idea of attaching tertiary amine tags to free amino groups of analyte molecules. The idea is not novel because the prior art disclosed the N-terminal derivatization of peptides with tertiary amines for the purpose of determining the amino acid sequence by mass spectrometry, as evidenced by Haralambidou et al., "Effect of Distal Positional Isomerism on Peptide Fragmentation. A Comparison of Dimethylaminobenzylidene and Benzoyl Derivatives", *Organic Mass Spectrometry*, Vol. 10, pgs. 683-697 (April 1975) (see pg. 684 second and third paragraphs, and pg. 696 second paragraph) (Haralambidou, as provided in the IDS dated 26 Sept. 2009). Because the common linking feature is known in the prior art, groups of inventions I-III fail to establish unity.

A telephone call was made to Teresa Rea on 01 June 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
